## *Aerospace Computing Laboratory*

# Drag Prediction of the DLR-F6 Configuration

Georg May, Dr. Edwin van der Weide,  
Sriram Shankaran, Prof. Antony Jameson

Stanford University

Prof. Luigi Martinelli

Princeton University

2nd AIAA CFD Drag Prediction Workshop, 21-22 June, Orlando, FL

# Multi-Block Structured Code

## FLO107-MB

- Cell-Centered Finite Volume Scheme
- H-CUSP Scheme for Convective Fluxes
- SLIP Construction
- Central Discretization for Viscous Fluxes
- Runge-Kutta Time Stepping
- Multigrid, Implicit Residual Smoothing, Local Time Stepping
- SPMD-Parallel Using MPI

STANFORD UNIVERSITY

*Aerospace Computing Laboratory*

# Turbulence Modeling

- Wilcox  $k-\epsilon$  Model
- Segregated (Single Grid)
- Same Algorithm as for Laminar Variables (But Only 1st Order Diffusion)
- Point-Implicit Treatment of Source Terms
- Fully Turbulent Flow

STANFORD UNIVERSITY

***Aerospace Computing Laboratory***

# Computer Architectures

- SGI Origin (IRIX 6.5), 32 Processors, 15GB Memory
- Linux (2.4.18) Beowulf Cluster, 48 Nodes, ~1GB Memory per Node

## Grids: ICEM Block-Structured

	WB	WBNP
Coarse	3.3	4.6
Medium	5.5	8.5
Fine	10	13.7

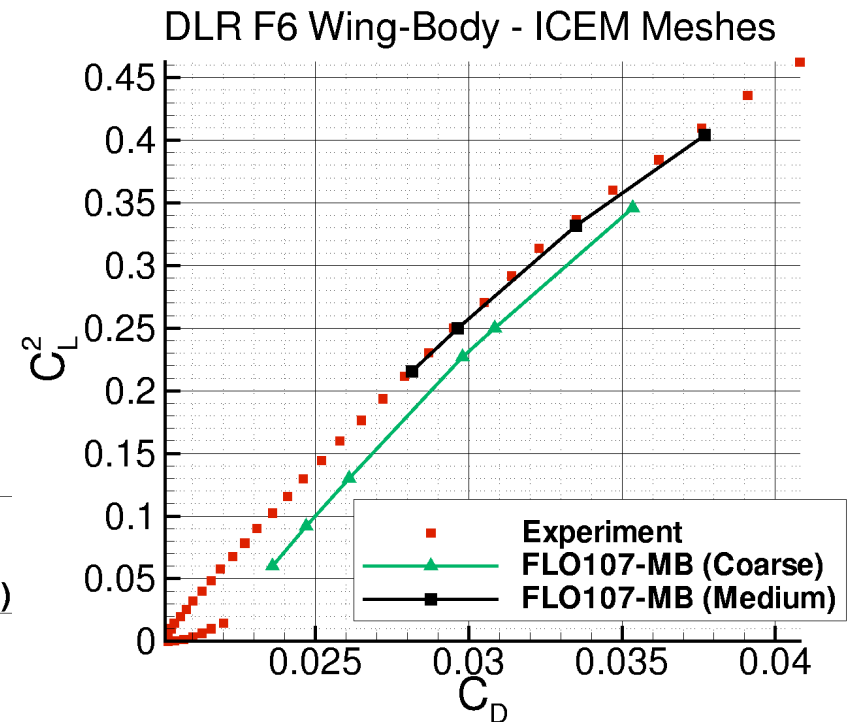

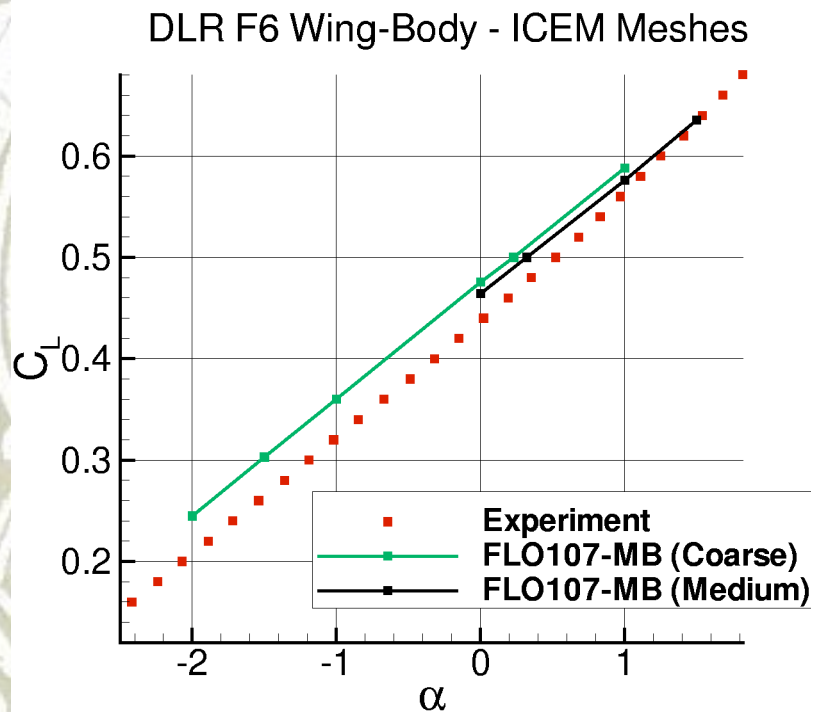

Cells in  
Million

# Wing-Body-Nacelle-Pylon

## Results (M = 0.75)

DLR F6 Wing-Body-Nacelle-Pylon - ICM Mesh Medium

DLR F6 Wing-Body-Nacelle-Pylon - ICM Mesh Medium

STANFORD UNIVERSITY

**Aerospace Computing Laboratory**

# Grid Dependency of Results

## Fuselage Skin Friction Drag

Wing-Body ~72 counts

Wing-Body-Nacelle-Pylon ~77 counts

---

□

~ 5 counts

STANFORD UNIVERSITY

***Aerospace Computing Laboratory***

# Wing-Body Pressure Distribution (M = 0.75, CL = 0.5)

STANFORD UNIVERSITY

**Aerospace Computing Laboratory**

# Wing-Body-Nacelle-Pylon Pressure Distribution

## ( $M = 0.75$ , Incidence = $0.19$ )

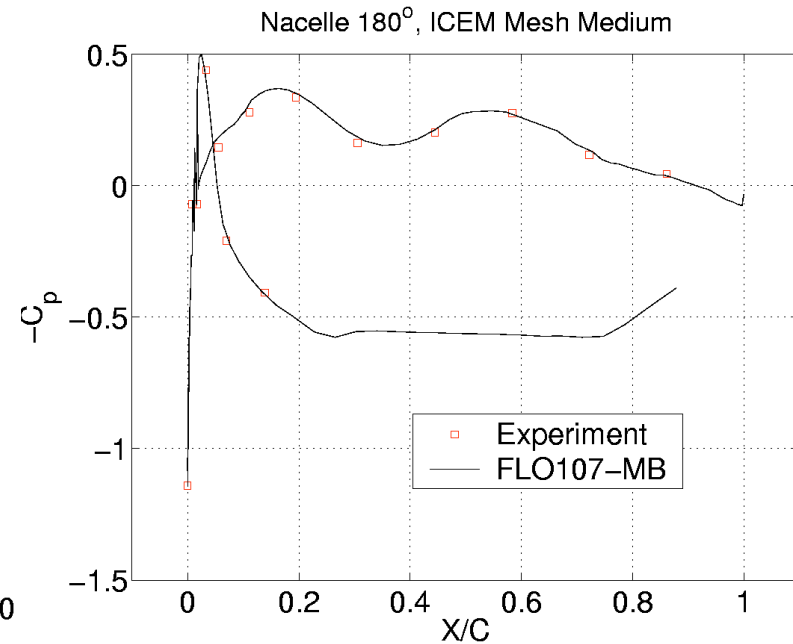

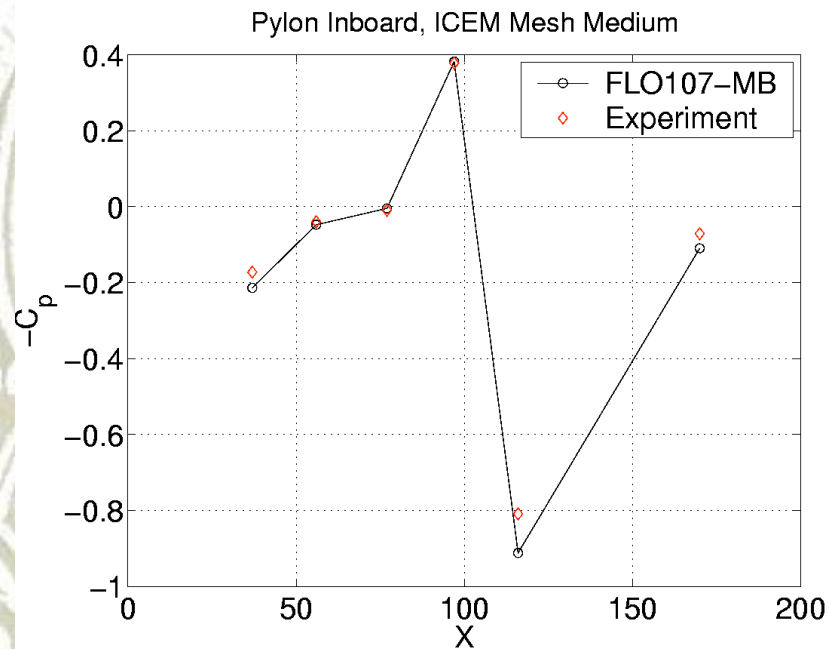

STANFORD UNIVERSITY

**Aerospace Computing Laboratory**

# Pylon and Nacelle Pressure Distribution ( $M = 0.75$ , Incidence = $0.19$ )

STANFORD UNIVERSITY

**Aerospace Computing Laboratory**

# Summary

- Correct Lift Slope and Polar Shape
- Good Agreement in Total Drag for Wing-Body configuration
- Deviation in Total Drag for Wing-Body-Nacelle-Pylon configuration likely due to Grid Dependency

STANFORD UNIVERSITY
